## MICROFIBER TOWEL COLLECTION

Microfiber cloths and towels are soft but very tough. This is because in a small surface area the fibers are connected to make a high density fabric. A microfiber cloth is good for up to 500 uses, and is therefore a very effective and inexpensive product. Microfiber towels absorb dirt and dust and can be used with or without water. Because the cloth is positively charged, while dirt and dust have a negative charge, the cloths work as a kind of magnet for dry use. This is great news for allergy sufferers! When used wet (with water only, no chemicals), they towels are great for scrubbing away even the most stubborn dirt.
