How To Figure Your Outside Orders

You will have guests who can't attend your party but will want to place an order. That's GREAT! Follow the instructions below or I can help you the night of your party.

1. List product item numbers, description, and price.
2. Add all product prices for a product total.
3. Shipping is \$3.95.

5. Tax is 13%. It is the easiest to take the subtotal and multiply it by 1.13. The answer will be the grand total.
